

Energize Delaware Farm Program

Helping Delaware Farms Reduce Energy Costs!

Equipment eligible for incentives may include, but is not limited to:

- **Tunnel Doors**
- **Energy efficient lighting**
- **Energy efficient HVAC**
- **Motors and motor controls**
- **Poultry house insulation**
- **Irrigation pump replacement**
- **Variable speed drives**
- **Sprinklers, nozzles and regulators**
- **Fuel switching**

Energize Delaware Farm Program Can Help You!

- **30% - 40% Cash Incentives** for qualified projects
- **Can be Combined** with NRCS EQIP Funding
- Low **fixed rate (2–3%), cash positive Loans**
- **Free** Renewable Energy Assessment

Georgie Cartanza is a familiar name to poultry producers along the Delmarva peninsula as a longtime DPI member with over 20 years in the poultry industry. She decided to participate in the Energize Delaware Farm Program to help fund some energy efficiency improvements on her 11-year-old broiler farm that will help deliver higher profit margins. First, she received an energy audit to evaluate the energy efficiency of her entire operation - from lights to fans to insulation. The audit recommended actions that would save a total of over \$14,000 annually in energy costs.

Georgie received an incentive of over \$13,200 covering 30% of the cost to install insulated tunnel intake doors, reducing her payback on the investment from 10 years to less than 7 years. Georgie recommends the program to any producer looking to save on energy costs. “The program truly offers something for every farm, and several sources of funding can be combined to maximize the savings,” says the award-winning organic poultry grower. “Plus, it’s easy to go through the process to get funding.”

RC Willin got an audit to help him find savings on his irrigation operation in Seaford, DE. “The EDFP helped me by providing an Energy Audit that showed me how I can save over \$6000 a year on energy. Best of all, the program will provide 30%-40% of the cost of doing the work!” RC Willin is eligible to receive nearly \$20,000 of incentive funding that can help him save up to an additional \$6,310 per year on his energy costs. These projects are expected to pay for themselves in energy savings in less than 5 years with the help of the incentives from the Energize Delaware Farm Program.

Call EnSave at **(800) 732-1399** today to get started!

The program is offered on a first-come, first-served basis as is available now.

The Energize Delaware Farm Program has been developed by the Delaware Sustainable Energy Utility and EnSave to serve Delaware agriculture. Some restrictions may apply.
